

### VP Minim

#### Description

Tank Washing is a vital part of a ships operation and it is essential that the equipment is reliable and fit for purpose. Victor Marine has a long tradition of supplying robust and efficient equipment and can offer both twin and single nozzle machines, offering a solution to all tank washing problems.

The VP Minim is a pre-programmed twin nozzle tank washing machine in 316 Stainless Steel. This unit is suitable for small chemical, product, inland water way tankers and bunker barges. It can be supplied as a fixed or portable application.

#### Key Features
